Score (Passmark 100%)

100% - Passed

Correct

You want to see what your level looks like when lighting is not used, how would you do this?

Select the Unlit View Mode

Remove all the Light Actors from your scene

Enable the Unlit property on all Actors

Change Lighting Build Settings

Correct

You want to easily select multiple Actors within your scene. Where are you able to do that in the editor?

World Outliner
